

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 02, 2018

SECTION 1: IDENTIFICATION OF THE SUBSTANCE /MIXTURE AND OF THE COMPANY

1.1 Product identifiers

Commercial product name(s):	C-TUFF™ Ceramic Parts: All Designations Silar® Ceramic Cutting Tool Parts: All Designations Silar® Microwave Absorbent Ceramic Parts: All Designations
Generic name:	Silicon Carbide Fiber/Microfiber-Reinforced Ceramics
REACH No.	A registration number is not available for this substance as the substance or its uses are exempted from registration, the annual tonnage does not require a registration, or the registration is envisaged for a later registration deadline.
CAS No.	See Section 3

1.2 Relevant identified uses of the substance or mixture, and uses advised against

Normally used as a ceramic component such as cutting tool, pump seal, or wear part.

1.3 Details of the supplier of the safety data sheet

Company:	Haydale Ceramic Technologies Inc. 1446 South Buncombe Road Greer, SC 29651, USA
Telephone:	+1-864-877-0123
Fax:	+1-864-879-6615
E-mail address:	info@haydale-technologies.com

SECTION 2: HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

This product is not classified as a hazardous substance or mixture. This product does not need to be labelled as hazardous.

Classification according to Regulation (EC) No 1272/2008 [CLP]

Not a hazardous substance or mixture according to Regulation (EC) No. 1272/2008.

Classification according to Directive 67/548/EEC

This substance is not classified as dangerous according to Directive 67/548/EEC.

2.2 Label elements

This substance does not need to be labelled in accordance with EC directives or respective national laws.

2.3 Other hazards

- 2.3.1** Silicon carbide (SiC) fibers/microfibers are a fibrous form of single-crystal silicon carbide having an aspect ratio of 3:1 or greater. SiC fibers/microfibers are non-toxic by ingestion, have no extractables, and are even approved for food contact in some situations.

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 2, 2018

Processing the solid ceramic article by operations such as grinding, finishing, polishing, machining, or other operation may create dust containing respirable silicon carbide microfibers, which may produce an inhalation hazard if airborne. When dispersed in water, solvent, polymer, or other carrier material (when wetted), SiC fibers/microfibers are non-respirable and non-hazardous. When SiC fibers/microfibers are incorporated into a matrix material or composite system (for example a polymer coating), they are non-respirable and non-hazardous. Under such conditions, there is no evidence to suggest that SiC fibers or microfiber ever become respirable, even when these matrix material or composite systems are subjected to mechanical wear. SiC fibers/microfibers are not a hazardous substance according to Regulation (EC) No. 1272/2008. Most agencies list SiC fibers/microfibers as non-hazardous even in dry powder form. However, some agencies list SiC fibers/microfibers as potential carcinogens, based on limited experimental animal data that suggests a carcinogenic effect. Any potential carcinogenicity of SiC fibers/microfibers is limited to chronic overexposure of dry, respirable dust. No data exists for humans.

Haydale Technologies Inc. recommends handling this substance with appropriate caution according to the recommendations of this safety data sheet to ensure workplace safety.

OSHA: non-hazardous.

ECHA: non-hazardous.

NTP: non-hazardous.

IARC: class 2B, "possibly carcinogenic to humans" of dry respirable dust, although no data exists for humans. This classification is for the entire family of refractory ceramic fibers, which includes silicon carbide fibers/microfibers.

ACGIH®: class A2, "suspected human carcinogen" for dry respirable dust, although no data exists for humans. Recommended exposure limits is 0.1 fibers/cc 8-hour time weighted average (TWA) for fibers greater than 5µm in length with an aspect ratio greater than or equal to 3:1 as determined by the membrane filter method at 400 to 450 times magnification (4-mm objective) using phase-contrast illumination.

2.3.2 Aluminum Oxide does not cause any health hazard under normal conditions of use and as delivered. High dust concentration in the working environment may cause mechanical irritation of the eyes, skin and respiratory tract. In its crystalline form, the product can have sharp edges that may cause cuts to the hands during handling.

SECTION 3: COMPOSITION / INFORMATION ON INGREDIENTS

3.1 Substances

Definition according to EC directive:	Silicon Carbide Fibers (Microfibers)	1-50%
CAS No.:	409-21-2 (silicon carbide)	
EINECS No.:	206-991-8 (silicon carbide)	
	Aluminum Oxide	50-99%
CAS No.:	1344-28-1 (alumina powder)	
EINECS No.:	215-691-6	

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 2, 2018

SECTION 4: FIRST AID MEASURES

4.1 Description of first aid measures

Inhalation:	If dust is created due to grinding, finishing, polishing, machining, or other operation using the material, and is inhaled, causing symptoms of pulmonary involvement, such as (coughing, wheezing, or shortness of breath), remove immediately from the exposure area to fresh air. If symptoms persist, seek medical attention.
Skin contact:	Not expected to present a significant skin hazard under anticipated conditions of normal use, but, if irritation or rash occurs, seek medical attention for symptomatic treatment.
Eye contact:	In case of eye irritation due to contact with material, immediately rinse with copious quantities of clean water, occasionally lifting upper and lower eyelids, until no evidence of material remains (approximately 15-20 minutes). If symptoms persist, such as pain, blinking, tears, or redness, seek medical attention.
Ingestion:	Not expected to present a significant ingestion hazard under anticipated conditions of normal use.

4.2 Most important symptoms and effects, both acute and delayed

The most important known symptoms and effects are described in SECTION 2.3 – Other Hazards and also in SECTION 11 – TOXICOLOGICAL INFORMATION.

4.3 Indication of any immediate medical attention and special treatment needed

No data available.

SECTION 5: FIREFIGHTING MEASURES

5.1 Extinguishing media

Dry powder, if created by using the material, is not flammable. Use extinguishing measures appropriate for the source of the fire.

5.2 Special hazards arising from the substance or mixture

None known.

5.3 Advice for firefighters

Wear pressure-demand, self-contained breathing apparatus and full firefighting protective clothing for firefighting if necessary.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions, protective equipment and emergency procedures

Wear personal protective equipment if warranted, to prevent breathing of respirable dust. It is recommended to work in an engineered closed system where respirable dust may be exhausted. If it is not easy or possible to work in an engineered closed system, a suitable respirator should be worn if dust is created.

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 2, 2018

For more information, see SECTION 8.2 – Exposure controls.

6.2 Environmental precautions

No special measures required.

6.3 Methods and material for containment and cleaning up

Dispose of according to national, regional, and local regulations.

6.4 Reference to other sections

For personal protection see SECTION 8. For disposal see SECTION 13.

SECTION 7: HANDLING AND STORAGE

7.1 Precautions for safe handling

None under normal use.

7.2 Conditions for safe storage, including any incompatibilities

No known incompatibilities.

7.3 Specific end use(s)

Apart from the uses mentioned in SECTION 1.2, no other specific uses are stipulated.

SECTION 8: EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Exposure Limits

Silicon Carbide Fibers (microfibers)

OSHA: non-hazardous.

ECHA: non-hazardous.

NTP: non-hazardous.

IARC: class 2B, “possibly carcinogenic to humans” of dry respirable dust, although no data exists for humans. This classification is for the entire family of refractory ceramic fibers, which includes silicon carbide fibers/microfibers.

ACGIH®: class A2, “suspected human carcinogen” for dry respirable dust, although no data exists for humans. Recommended exposure limits is 0.1 fibers/cc 8-hour time weighted average (TWA) for fibers greater than 5µm in length with an aspect ratio greater than or equal to 3:1 as determined by the membrane filter method at 400 to 450 times magnification (4-mm objective) using phase-contrast illumination.

Aluminum Oxide

OSHA PEL: 15mg/m³ TWA - respirable: 5mg/m³ TWA

ACGIH® TLV® 10 mg/m³ TWA

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 2, 2018

8.2 Exposure controls

General protection and hygiene measures:	Observe general industrial hygiene practice.
Respiratory protection:	None under normal use. If dust is created due to grinding, finishing, polishing, machining, or other operation of the material, use an engineered closed system if possible during handling. If it is not easy or possible to work in an engineered closed system, a suitable respirator should be worn, to prevent breathing of respirable dust. A respirator with category N95 filters should be used.
Hand protection:	Not normally considered a skin hazard. Where use can result in skin contact, practice good personal hygiene, and wash hands and other exposed areas with mild soap and water before eating, drinking, smoking, using toilet facilities, or leaving work.
Eye/face protection:	Use protective goggles to prevent contact with eyes. Use equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).
Environmental exposure controls:	No data available.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1 Information on basic physical and chemical properties

(a) Appearance:	Variable, typically gray-green powder.
(b) Odour:	Odourless.
(c) Odour threshold:	Not applicable.
(d) pH:	Not applicable.
(e) Melting point / freezing point:	Decomposes above 2500°C
(f) Initial boiling point and boiling range:	Not applicable.
(g) Flash point:	Not flammable by conventional test methods.
(h) Evaporation rate:	Not applicable.
(i) Flammability (solid, gas):	Not flammable.
(j) Upper/lower flammability or explosive limits:	Not applicable.
(k) Vapour pressure:	Not applicable.
(l) Vapour density:	Not applicable.
(m) Relative density:	3.30-3.97.
(n) Water solubility:	Insoluble in water.

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 2, 2018

(o) Partition coefficient: n-octanol/water:	Insoluble in both water and n-octanol.
(p) Auto-ignition temperature:	Not applicable.
(q) Decomposition temperature:	Not applicable.
(r) Viscosity:	No data available.
(s) Explosive properties:	Not applicable.
(t) Oxidizing properties:	Not applicable.

SECTION 10: STABILITY AND REACTIVITY

10.1 Reactivity

This material is stable. No hazardous reactions known.

10.2 Chemical stability

This material is stable. No hazardous reactions known.

10.3 Possibility of hazardous reactions

Not applicable.

10.4 Conditions to avoid

Not applicable.

10.5 Incompatible materials

Not applicable.

10.6 Hazardous decomposition products

None known.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on toxicological effects

11.1.1 Silicon Carbide

(a) Acute toxicity	LD50 for dry silicon carbide powder is > 2.000 mg/kg
(b) Skin corrosion/irritation:	No data available.
(c) Serious eye damage/irritation:	No data available.

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 2, 2018

(d) Respiratory or skin sensitization:	No data available.
(e) Germ cell mutagenicity	No data available.
(f) Carcinogenicity:	See SECTION 2.3 – Other hazards.
(g) Reproductive toxicity:	No data available.
(h) STOT-single exposure:	No data available.
(i) STOT-repeated exposure:	No data available.
(j) Aspiration hazard:	No data available.
Further toxicological information:	Silicon carbide is not bioactive and not known to absorb into living tissues. Silicon carbide is not sensitizing and is non-toxic by oral ingestion.

11.1.2 Aluminum Oxide

(a) Acute toxicity	Oral LD50 for dry Aluminum Oxide: >5000 mg/kg bwt (rats)
(b) Skin corrosion/irritation:	None.
(c) Serious eye damage/irritation:	No effects apart from mechanical irritation.
(d) Respiratory or skin sensitization:	None.
(e) Germ cell mutagenicity	None.
(f) Carcinogenicity:	None.
(g) Reproductive toxicity:	None.
(h) STOT-single exposure:	No data available.
(i) STOT-repeated exposure:	No data available.
(j) Aspiration hazard:	No data available.
Further toxicological information:	

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics
Revision: 7; Revision Date: April 2, 2018

SECTION 12: ECOLOGICAL INFORMATION

12.1 Toxicity

No data available.

12.2 Persistence and degradability

No data available.

12.3 Bioaccumulative potential

No data available.

12.4 Mobility in soil

No data available.

12.5 Results of PBT and vPvB assessment

PBT/vPvB assessment not available as chemical safety assessment not required/not conducted.

12.6 Other adverse effects

No data available.

SECTION 13: DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

Product disposal: Unused materials should be disposed in accordance with national, regional, and local solid waste regulations.

Contaminated packaging: Not applicable to the solid ceramic article as supplied.

SECTION 14: TRANSPORT INFORMATION

14.1 UN Number

ADR/RID: Not dangerous goods.

IMDG: Not dangerous goods.

IATA: Not dangerous goods.

14.2 UN proper shipping name

ADR/RID: Not dangerous goods.

IMDG: Not dangerous goods.

IATA: Not dangerous goods.

14.3 Transport hazard class(es)

Not dangerous goods.

14.4 Packing group

Not dangerous goods.

SAFETY DATA SHEET

Silicon Carbide (SiC) Fiber/Microfiber Solid Ceramics

Revision: 7; Revision Date: April 2, 2018

14.5 Environmental hazards

None known.

14.6 Special precautions for user

No data available.

SECTION 15: REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

No data available.

15.2 Chemical safety assessment

For this product a chemical safety assessment was not carried out.

SECTION 16: OTHER INFORMATION

This information covers the safety requirements of the product(s) exclusively and is based on current knowledge and experience. This safety information should be used for information purposes only, and does not represent a guarantee for properties of the described product(s) in terms of any legal warranty. Haydale Ceramic Technologies, LLC shall not be held liable for any damage resulting from handling or from contact with the above product.
