GRAPHENE FACE MASK

Innovation underpins everything we do

SynerG Graphene Enhanced Antibacterial Face Mask

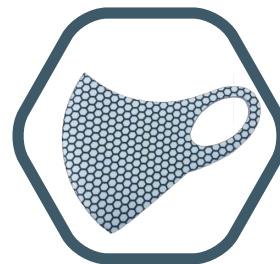

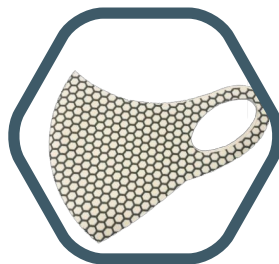

with Excellent Soft Touch and Breathability

Available in 3 colours:
Black, Beige, Blue

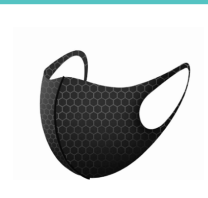

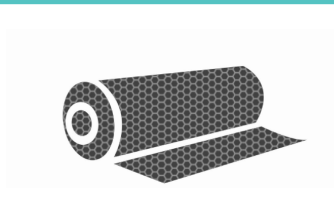

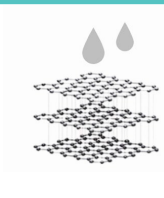

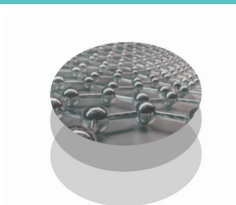

✓ 99.9%

- Made using Neoprene: Smooth texture offering breathability in warmer weather and warmth in cold weather. The mask is wind and heat resistant, has few wrinkles and a soft touch. It has high levels of elasticity, giving a close and comfortable fit.
- Reliable High-Quality GNP Manufacturing Process: Maximising antibacterial and deodorising effect of the mask. Blocks infrared rays offering added protection.
- Ideal Fit: With an ergonomic design, the mask is produced to maintain its 3D stereoscopic shape that fits the face shape in any situation. It provides a light, soft and comfortable fit.
- Reusable: Washable fabric. Handwashing up to ten times will prevent deformation, the mask can be quickly dried and reused.

Graphite → Graphene nano platelet extraction from grap → Dispersion/ Hydrophilised → Printing on the material → GNP garment fabric

Special processing

GNP special washable fabric complete

Applied to the mask
